

# Explore Your Under Graduate Course Fit

20 min AI based psychometric test

FOR  
**₹1000** Only + GST

## Why this Assessment?

Frequently, students experience confusion when considering which undergraduate course to pursue. They are bombarded with numerous viewpoints and opinions from various sources, further complicating their decision-making process. However, beyond the multitude of external influences, making decisions based on introspecting our innate strengths and preferences can provide a solid foundation.

The test aids students in 11th and 12th grade in identifying the best set of UG course streams like arts, science, engineering, commerce etc. (out of 30+) that best fits your natural talent/strength and personality.

GET A DETAILED PERSONALIZED REPORT.

## Who will Benefit?

- Parents who are guiding their children on engineering choice
- Students in 11th and 12th standard.
- Students aspiring for engineering study.
- Academic counsellors to offer tailored guidance to students.

## What you Get?

- Test outcomes categorize fitment into 30+ course types.
- Fitment is graded on a scale ranging from top fit to low fit, with reasoning provided.
- Insights from the mapping assist in developing, refining, and focusing academic efforts for success.

**98%** participants say it helps in their decision making

**100%** participants appreciated the details, rationale and fitment

## About the test

**This 20-minute online psychometric test is crafted to pinpoint your natural talents, strengths, and preferences, aligning them with more than 30+ common UG course types.**

Disclaimer: Like every other tests, psychometric tests carry margin of error. We ask you to consider the outcome as one of the inputs to your decision-making process. Relying solely on one method carries limitations. Therefore, combining its results with other similar guidance, tests, and assessments can offer a more comprehensive view to inform your decision-making process effectively.
